

Bug 45338 – Report-Builder: Details could not be hold together.

The area "Detail" is formatted so, that all content of Detail should be kept together. Number, UnitPrice and Date should be on one page, not shown with a pagebreak.

And here you see the report, when executed. There is a page-break after "Number". This is a wrong behaviour. "Number":"3" must appear at the same page with "UnitPrice":"13.37" and "Date":"07/26/12".
