hello.c

Page 1/1

```
/*  
 * hello.c -- hello word  
 *  
 * This is a simple hello world for illustrating a bug in evince.  
 * After an a2ps followed by a ps2pdf, keywords should be in bold and  
 * standard code in normal weight. Unfortunately, evince shows  
 * standard code in bold too.  
 */  
  
#include <stdio.h>  
  
int  
main (int argc, char *argv[])  
{  
    if (argc > 0)  
        printf ("Hello world!\n");  
    return 0;  
}
```
