```c
/*
 * hello.c -- hello word
 *
 * This is a simple hello world for illustrating a bug in evince.
 * After an a2ps followed by a ps2pdf, keywords should be in bold and
 * standard code in normal weight.  Unfortunately, evince shows
 * standard code in bold too.
 */

#include <stdio.h>

int
main (int argc, char *argv[])
{
  if (argc > 0)
    printf ("Hello world!\n");

  return 0;
}
```
